

Understanding Dyslexia for Parents

Presented by

The National Institutes of Health state that dyslexia affects 15% of the population. It is often misdiagnosed. Signs of Dyslexia may include the following: slow in acquiring reading skills, omits, substitutes and guesses at words, oral reading is slow and laborious, does not like to read, disastrous spelling, messy handwriting, and trouble reading math word problems. Specific signs of dyslexia will vary from person to person. If this sounds like someone you know we invite you to please join us as we discuss dyslexia and solutions for your struggling reader.
